GUI WITH HTML & CSS

Creating a good graphical user interfaces with HTML & CSS is hard.

- HTML is primarily a markup language.

- CSS can help you, but is dependent on your HTML code.

- Need to work good on devices with different capabilities.
    - Screen size
   - Mouse VS Touch

HTML & CSS FRAMEWORKS

Good designers have written good HTML & CSS we can re-use.
- CSS classes.
- Components.

Bootstrap is one of the most starred GitHub projects.

RESPONSIVE DESIGN
